

Our commitment to transparency

Endorsement from official bodies helps consumers make informed decisions about paper products that respect the environment and promote sustainable practices. Their criteria are rigorous and regularly verified.

Rolland's numerous attributes and our FSC® certification make us one of North America's most environmentally friendly paper manufacturers.

CERTIFICATION

**FSC®**  
Forest Stewardship Council® Certification supports responsible use of forest resources.

**FSC® Recycled**  
FSC® Recycled labels identify products which are made with 100% recycled fiber.

**FSC® Mix sources**  
Certifies the product comes from well-managed forests, controlled sources and/or recycled fiber.

**Preferred by Nature™**  
Rolland's FSC® Chain of Custody (FSC® C009908) is certified by Preferred by Nature™. Preferred by Nature™ is a non-profit organisation working to support better land management and sustainable business practices that benefit people, nature and the climate in over 100 countries.

DESIGNATION

**The Ancient Forest Friendly™**  
The Ancient Forest Friendly™ designation is one of the most rigorous paper labels available. Ancient Forest Friendly paper is free of ancient or endangered forest fiber, made with 100% recycled fiber, and whitened without chlorine.

ATTRIBUTES

**Möbius loop**  
The recycling symbol (or Möbius loop) indicates that a product or packaging is recyclable, contains recycled content, or both. When used to show that a product or packaging contains recycled content, the percentage of recycled content should appear, either inside or next to the symbol. When a Möbius loop is used to indicate a product is both recyclable and contains recycled content, there must be an explanatory statement supporting both claims.

PERMANENT

**Permanent paper**  
Alkaline or neutral paper that resists aging for more than 100 years under normal warehousing conditions (criteria and certifications established by the American National Standards Institute—ANSI).

**Biogas energy**  
Paper manufactured using a green and local energy resulting from the decomposition of organic waste out-of a landfill site. The use of biogas for our thermal energy needs allows us to considerably reduce our greenhouse gas emissions at the source.

ECF

**Elemental Chlorine Free**  
The paper's virgin fiber has been bleached without chlorine, but with a chlorine derivative.

PCF

**Process chlorine free**  
Recycled paper manufactured with a chlorine-free process.

# PRODUCT CHART

	RAW MATERIAL			ATTRIBUTES				Available basis weights
	Sustainable recycled fiber 	CERTIFICATION	DESIGNATION	ENERGY	BLEACHING PROCESS		Permanent Paper
