

Sustana EnviroBright™ is a 100% sustainable recycled fiber that is exceptionally clean and requires minimal refining, which can result in energy savings.

A blend of high quality hardwood and softwood fibers result in pulp that can be used to produce a 100% recycled paper product.

- Can be used to make a range of printing and packaging papers
- High performance and sustainable results
- Available in both standard and high brightness levels

**NOW IN DRY BALE FORM**

- Increased shelf life
- Reduced shipping costs
- Easier to handle and stack

**TYPICAL BALE DIMENSIONS**

	Length	Width	Height	Weight
	35 in	25 in	20 in	500 lb

~ 90% SOLIDS | BALE STRAP OPTIONS: REPULPABLE OR WIRE
